Preparation

[UM general PhD trainings - Maastricht University Library](#)

For the various workshop we ask you to do some homework. The homework consists of watching a couple webinars on the various topics which are available from Maastricht University Library (see link above). Have a look at these webinars and try to answer the questions raised. Some topics might have a Maastricht University context, try to neglect the context and imagine how and whether it would apply in your situation. There is no good or wrong in this, so no stress, it is rather a matter of considering the various issues, making up your mind and being prepared to discuss and share your ideas.

For Scientific Integrity:

- Check the UM webinar Introduction to Research Integrity and Ethics

For Open Science:

- Check the UM webinar Introduction to Open Science

For FAIR principles and Data Management

Check the UM webinar Research Data Management and FAIR principles

For meeting with editor:

- Check the UM webinar Introduction to Open Access Publishing and Open Access Publishing
- Have a look at the website of the International Journal of Lower Extremity Wounds
